Vacuum & Air Systems

The **FREEDOM TRUSS SYSTEM**

The Freedom Truss System is a modular piping, canopy and support structure to complement your centralized vacuum. Whether you need one or 100 vacuum hoses, the Freedom Truss System allows you to build a customized support structure to your specifications. And with two or more trusses,

you can add a canopy to create an inviting, shaded vacuum area. Other options include individual cyclonic primary separators for each truss, and vacuum-on-demand metering devices. The Freedom Truss system is completely modular so it grows with your business.

The freedom to choose – start with your truss system and add any or all of our options.

Start with Your Vacuum Truss

- Each truss can serve one or two customers – you decide the number of hoses.
- Cantilever design maximizes usable space and affords optimum flexibility.
- Vacuum tool is delivered directly to the customer’s door – no more hoses dragging on the ground.
- System is modular and expandable so it can grow with your business.
- Built to last, the all steel heavy-duty construction features a durable finish.
- Certified engineering stamp is available upon request.

Add the IntelliVac to Meter Airflow

- IntelliVac technology allows you to meter your airflow and manage electrical costs.
- Turn your free vacuums into a profit center.
- You decide how long customers vacuum free of charge and give the option to buy more vacuum time.
- You select payment methods: token, coins, bills, credit cards, keypad.

Choose Your Canopy

- With two or more trusses, add a canopy to create an attractive vacuum area.
- Choose from a variety of solid and mesh shade materials to complement your site.
- Solid canopies are solution-dyed to give excellent fade and weather resistance.
- Mesh canopies are vinyl coated polyester for extreme durability.

Cyclonic Primary Separators

- Compact cyclonic separators can be added to each truss.
- Primary separators capture dirt and debris before air enters piping.
- Allows for easy recovery of customer items accidentally vacuumed.
- Each separator serves up to two hoses.
