PORTABLE VACUUM

AutoVac’s improved portable vacuum is more durable and more convenient than ever. For starters, the new stainless steel construction resists rust. And since it’s lighter, it’s easier to maneuver - plus you’ll save on shipping costs.

And who says a vacuum has to be dull? Choose a custom paint or a powder coat finish. Add your logo with a decal package. You can even pick the color of your dome, hose, and hand tool.

Choose from eight base models varying in electrical requirements and number of motors and hoses.

All the power you’d expect from an AutoVac portable vacuum - in a more convenient, more durable (and better looking) package.
PORTABLE VACUUM

Durable and Powerful
• Stainless steel resists rust
• Completely seam welded (no tack welds)
• Heavy duty hinges on service doors
• 40’ 12 gauge electrical cord with oil resistant, extra thick jacket and roll-up hanger
